Projects Type : infrastructure projects , it is a Bridges

I Works with : Engineering Consultant Firm

Civil Site engineer @ Dar Al Handasah , Duration : June 2008 – June 2009

Acting as Civil Site engineer in the Expansion of Arab Potash Company Four projects in the Dead Sea , my role is to provide technical advice about, plan, organize and supervise construction projects , and check the quality of the works And as part Engineering Supervision and projects management Core Team .

The Project are industrial as follows:

- PK1 Solar and Carnallite Ponds
- PK2 Cold Crystallization Plant (CCP) and New Compaction Plant
- PK3 New Intake Pump
- PK4 Warehouse Extension (New Safi Warehouse) Building

the projects contains dike construction, concrete and steel work , mech. and elec. and piping work , sheet piles and cut-off slurry wall

Location and Objectives

dead sea area

The Project aims at increasing the Arab Potash Co. (APC) plant production, optimizing the refinery plants performance and expanding the present facilities to achieve a production capacity of 2.45 Million Tons/ year as compared to its current level of 2.0 Million Tons/ year, with an overall focus on increasing profitability.

Project Description and Components

A. Solar and Carnallite Ponds (Package 1)

The scope of work involves the expansion of the carnallite ponds and the restructuring

of the Salt Ponds area to cater for the production expansion of 0.45 Million Tons per year.

The work components include:

Civil works including dike construction works to increase the carnallite ponds area by 12 square kilometers.

Dikes constructed from granular fill (provided with riprap slope– protection) of height ranging from 3 m to 4 m. The total length of the new dikes is about 5 km;

Transfer channel with a total length of about 650 m;–

Slurry wall cut-offs with an HDPE geomembrane installed from the top– of existing dikes (modified to suit the new conditions). The total cut-off length is about 9 km and ranges in depth from 6 m to 17 m;

Upgrading of existing dikes with a total length of about 20 km;–

Construction of a brine lifting station supported on unfilled steel tubular piles and steel structure;–

Construction of a new pumps pads and electrical equipment facilities– foundations at the two new pumping stations and two existing pumping stations.

Projects Value : 120 million USD
